

The skin's glow depends on the light reflection. Smoother skin reflects the light evenly and thus appears radiant, rosy and nourished. Natural skin ageing, which can be sped up by environmental factors, shows through processes such as the reduction of collagen, elastin and hyaluronic acid, the slowing down of cell regeneration and a reduced level of skin oils. These changes result in unevenness, wrinkles, localised changes in the thickness of the horny layer and dry skin, which prevent the even diffusion of light and make the skin look pale. The microcirculation (circulation in the capillaries) decreases over time. As a result, certain skin layers are supplied with less oxygen and fewer nutrients, which further reduces the skin's glow. Depending on lifestyle and individual skin type, hyperpigmentation (such as liver spots) can also occur.

The nutriderm line provides a comprehensive range of nourishing and regenerating products, a serum as well as day and night care products for vital and glowing skin.

nutriderm. The product range.

Serum

NUTRIDERM PIGMACARE® SERUM

Every skin type

Day care

NUTRIDERM DAY CREAM

Normal and dry skin

NUTRIDERM DAY CREAM ÉCLAT ROSÉ UV 50

Every skin type

Night care

NUTRIDERM NIGHT CREAM VITALISANTE

Dry skin

NUTRIDERM PIGMACARE® SERUM

Balancing serum with niacinamide and vitamin C reduces pigmentation spots for an even complexion.

Every skin type

- Against pigmentation spots
- Evens out skin tone
- Improves the skin's structure
- Moisturises

With niacinamide (vitamin B₃), tocopheryl acetate (vitamin E), ascorbyl glucoside (vitamin C), hexylresorcinol, resveratrol, glycyrrhetic acid, tetrapeptide-30

Main ingredients in the nutriderm products.

Louis Widmer Biostimulators Complex

The unique Biostimulators Complex is the result of Louis Widmer's own and intensive research and in-house work. The complex, which combines nine carefully selected amino acids, is a "signature ingredient" that is used as a basic ingredient and as a booster for strengthened, vital skin. In combination with selected key ingredients, it achieves highest product-specific effectiveness and excellent skin tolerance.

- Immediate moisturising effect
- Strengthens the skin barrier
- Promotes cell vitality
- Increases cell renewal and collagen synthesis
- Highly effective, even in the deepest skin layers

Niacinamide

The water-soluble vitamin B₃ derivative is used in the treatment of various skin irritations and pigmentation disorders.

- Increases the content of the epidermal proteins as well as the lipid synthesis of the upper layer of the skin (horny layer)
- Strengthens the barrier in the horny layer
- Boosts skin regeneration, reduces wrinkles and balances out pigmentation disorders
- Brightens the skin and reduces uneven pigmentation

Personal advice.

Good and comprehensive skin care requires competent specialist advice as it takes years of experience and in-depth knowledge to provide each customer with individual advice that considers their skin type and condition. Louis Widmer supplies its products exclusively to specialist retailers to ensure that customers receive excellent advice.

We care.

Environmental responsibility is one of the company's principles – from development to product. Louis Widmer has zero tolerance for animal testing and is committed to the "Cruelty-free" label. Almost all of the products are vegan and do not contain any solid microplastic particles. It is ensured that the majority of the packaging is recyclable, that mono-materials and recycled materials are used and that the amount of packaging is reduced. As a partner of the ECOALF Foundation, Louis Widmer also actively supports the protection of marine ecosystems.

BESTSELLER

NUTRIDERM DAY CREAM

Nourishing, firming day cream with hyaluronic acid for a healthy complexion.

Normal and dry skin

- Soothes lines and fine wrinkles
- Nourishes and hydrates
- Increases the skin's ability to retain moisture
- Rich, creamy texture

With Biostimulators Complex, Matrixyl® 3000, shea butter, panthenol, vitamin E, creatine, hyaluronic acid

Clinical study results.

- ✓ Reduction in skin flaking of 49%
- ✓ Reduction in skin roughness of 19%
- ✓ Reduction in wrinkle volume of 23%

Source: Clinical study over 4 weeks with 2 daily applications on inner lower arm

LEGEND:

Day	Hydration	0% microplastic	Lightly scented
Night	Gentle/mild	0% solid microplastic	Non-scented
Vegan	UVA/UVB protection	Cruelty-free	

NUTRIDERM DAY CREAM ÉCLAT ROSÉ UV 50

Nourishing day cream with high UV protection and Gatuline® Radiance for a fresh rosy complexion and radiant luminosity.

Every skin type

- High UVA/UVB protection
- Moisturises intensively, nourishes and protects
- Even and refined complexion
- Radiantly beautiful skin tone

With Biostimulators Complex, Gatuline® Radiance, vitamin E, shea butter, panthenol, creatine, UVA and UVA filters, broad-spectrum filters

 - ✓ Improved the skin's radiance: 91%
 - ✓ Improved the skin's glow: 95%

Source: User study by dermatological institute with 22 users over 2 weeks, applied regularly

NUTRIDERM NIGHT CREAM VITALISANTE

Nourishing, firming night cream with the Louis Widmer Biostimulators Complex revitalises dry skin and reduces fine lines.

Dry skin

- Nourishes intensively, hydrates and regenerates
- Soothes lines and fine wrinkles
- Stimulates tissue regeneration
- Promotes circulation

With Biostimulators Complex, vitamin A, vitamin E, panthenol

The use of specific day and night care products.

Day care:
Protection, prevention and specific care
 Well hydrated skin is better able to protect itself against environmental factors. The sun protection factor (SPF), which should include both UVA and UVB filters, is a crucial part of skincare for the day. This provides care and protection.

Night care:
Regeneration and repair
 Transepidermal water loss is worse during the night and the skin's microcirculation is stronger than during the day, which makes it easier to absorb ingredients. Cell-repairing ingredients such as vitamin A can penetrate the epidermis where they unfold their full effect.
